The new JF Cloud App is available!

Updating you black controller box is easy, follow these simple steps

1. Search and Download the new app, Jellyfish Cloud, from your Appstore (has Jellyfish logo with clouds in the background).

2. Make sure your black controller box is on and connected to your wifi (it will have a *9 or #9 in the upper right corner of the screen if it is connected to wifi).

3. Open app and click on "create" new account.

4. Register your email and create a password. The app will then want to verify your email by emailing you. Verify the email and continue setting up account.

5. Making sure you are on the same wifi the controller was set up to, now open and log in to the app.

6. Click on "add existing controller"

7. It will automatically scan for your controller, select it

8. The app will let you know the controller needs a new update to work with the new app. Press "update controller"

9. It will take several minutes to update

10. Then you should be good to go, you can now control your lights from anywhere in the world.

If you would like a JellyFish Professional to do the setup and installation of the new JellyFish Designer Cloud App for you, please call into the office to set up a service call. Standard service call rates apply.
